ENDEAVOR SCIENCE (AETH-1)

EXECUTIVE SUMMARY

"The GitHub for Scientific Computing"

TestDemo | testdemoqwenai2025@gmail.com | August 2026

VISION

To become the definitive platform where every scientist, researcher, and student conducts computational research — making world-class scientific tools accessible to everyone, everywhere. We are building the infrastructure that will power the next century of scientific discovery.

THE PROBLEM

- Scientists use **15+ fragmented tools** that don't work together
- **$10K-$100K/license** annually; **60% time** fighting software
- **52% of researchers** can't reproduce their own work
- Total waste: **$54 BILLION** globally

OUR SOLUTION

- **One unified platform** replacing 20+ fragmented tools
- **Free Community** + Enterprise paid tiers
- **Browser-based**, no installation, reproducibility by default

MARKET OPPORTUNITY

$78B	$35B	$8.5B
TAM by 2030 | CAGR 11.6%	SAM: Cloud | CAGR 24%	SOM: Initial Target

BUSINESS MODEL

- **Freemium:** Free → Pro $29/mo → Team $149/mo → Enterprise Custom
- Target **5-10% conversion** from free to paid tiers
- **Year 5:** $228M ARR, 480K paid users

FOUNDER CREDENTIALS

- **Post-graduate:** Life Sciences, Chemistry, Physics expertise
- **Full-stack:** Assembly → C → Fortran → JVM → Modern Web
- **Rare combo:** **TestDemo is BOTH** scientist AND engineer
